

# Industry Overview: Engineered Wood

Increased Safety and Effectiveness = More Profitability

## A Faster, Better Clean.

Most current cleaning processes utilize angle grinders which can be time consuming and dangerous, requiring cleaners to work within the machines in close proximity to hot residues and dust. In addition, this manual cleaning method is ineffective due to unreachable areas of the machine where parts simply don't get cleaned. Dry ice blasting provides a fast, safe and economical alternative to traditional cleaning methods.

## Discover Cold Jet.

Contact Cold Jet today to speak with an industry expert and choose the best cleaning solution for your application. Call **1.800.337.9423** or visit us online at [www.coldjet.com](http://www.coldjet.com) to learn more.

### APPLICATIONS

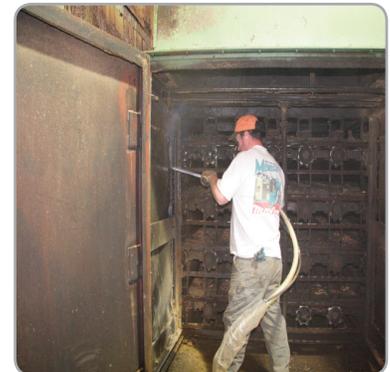

- OSB presses
- Sanding Belt
- Wet Scrubber
- Dryer
- Peeler / Lathe
- Glue Applicator
- Ventilation Blades
- Pitch & Resin Removal
- Finger Joint Blade Holder

### KEY BENEFITS

- Reduce fire hazard
- Reduce labor costs
- Reduce downtime
- Non-abrasive process
- Increase employee safety
- Eliminate secondary waste
- Clean in-place; no cool down required
